REASONS FOR ALLOWANCE

1. Claim 3 is allowed.

The following is an examiner's statement of reasons for allowance: the prior art of record does not anticipate nor render obvious to one ordinary skilled in the art a method of making a liquid crystal display device comprising a combination of various steps as claimed, more specifically, radiating light onto the liquid crystal layer while applying a DC voltage between the common electrode and the pixel electrode by applying a voltage to the common electrode and the three bus lines (the gate bus line, the data bus line, and the Cs bus line) formed on the second substrate.

JP 2001-91974 discloses a method of making a liquid crystal display device comprising radiating light to the liquid crystal layer and application of an AC voltage between the common electrode and the pixel electrode. However, the reference fails "radiating light onto the liquid crystal layer while applying a DC voltage between the common electrode and the pixel electrode by applying a voltage to the common electrode and the three bus lines (the gate bus line, the data bus line, and the Cs bus line) formed on the second substrate".

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
